As a citizen of South Carolina I am 100% against Dominion energy being able to raise prices on solar energy. They should not have the power or access to politicians, to be able to do this. Citizens of SC should be able to utilize solar energy how they see fit, and the market place should award innovation in helping to meet this demand, in the process making solar more accessible for all.

sincerely,  
Todd LeVasseur  
Folly Beach, SC

"we are receptive, imaginative beings, adapted to celebrate and rejoice in the existence, quite independent of ourselves, of the other beings on this planet."--Mary Midgley "We are creating a less stable and interesting place for our descendants to inherit. They will understand and love life more than we, and they will not be inclined to honor our memory." ---E.O. Wilson "The tree, which moves some to tears of joy, is in the eyes of others only a green thing which stands in the way."--- William Blake
